I am a fresh graduate in Informatics Engineering from Tanri Abeng University with a strong passion for learning new things. During my undergraduate studies, I actively developed my technical skills through various experiences, including an internship as a Frontend Web Developer at PT Diatera Cipta Teknologi, participating in the independent study program at Bangkit Academy with a focus on Machine Learning, and co-founding a digital startup called Tetrabit with my friends. Through these experiences, I have become accustomed to solving problems analytically, learning independently at a rapid pace, and working adaptively in various situations, whether as part of a team or individually.

EDUCATION

2021-2025

Tanri Abeng University

Informatics Engineering Study Program

Skills Program:

Web Programming, Mobile Programming, and Project Documentation

EXPERIENCE

SEPTEMBER 2024 - NOW
